

Ligna-design®

A new concept in concrete paving.

Blyko distinctively creative in design

Ligna-design®

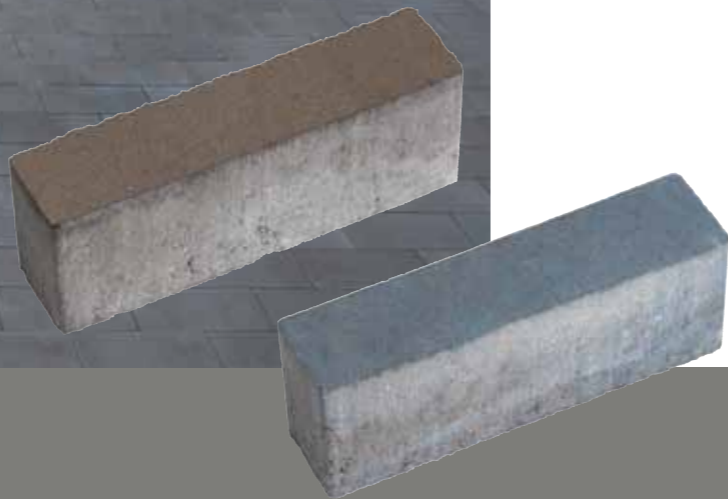

Beautiful for longer!

Aquafreni®

The Ligna-design® range of paving are treated with Aquafreni® that considerably reduces discolouring due to water related contamination. Aquafreni® is an inert water-resistant additive that forms part of the upper wear-resistant layer. The lower retention of water has the additional advantage of reducing the potential of lime efflorescence.

Ligna-design®

Eye-catching **unique paving** that creates a stylish look and feel.

The **Chocolate Brown** and **Night Blue** colours both enhance contemporary

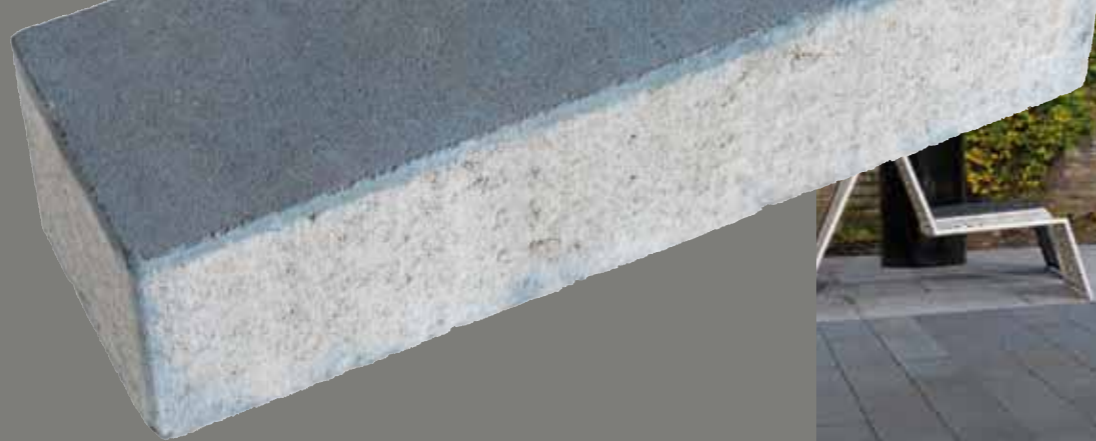

design. Available for delivery to meet the **customers exact** requirements for a

special paved finish. Every full pack has a **protective cover** and includes laying instructions.

Ligna-design®

3

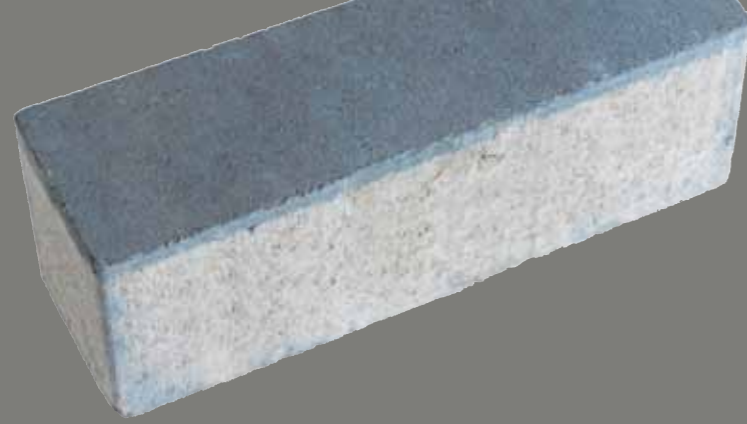

The selection of a larger pavior such as the 630 x 210 x 80 mm **Ligna** can accentuate the perspective of space depending on the laying direction. The Night Blue colour can be selected as it, combines beautifully with water features such as ponds and fountains.

Ligna-design®

4

5

The design pictured is a combination of

350 x 110 x 80 mm **Ligna** Chocolate Brown and Night Blue.

The blend of colours creates a distinctive effect and illustrates that

the two colours integrate together perfectly.

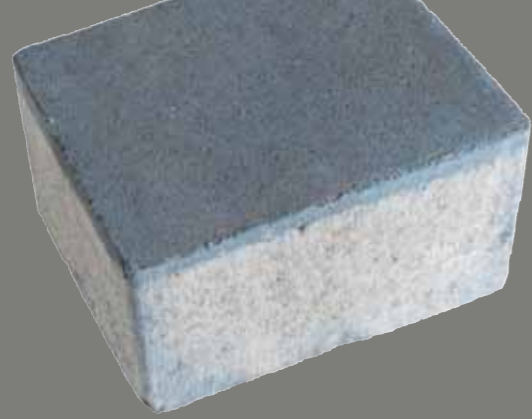

Ligna-design®

The **Quadriligna®** paving is an unusual combination of four different lengths and three different widths and is supplied as a complete package. The **Quadriligna®** paving allows a creativity of design resulting in a random finished appearance. The picture is an example of the **Chocolate Brown** colour.

Ligna-design®

The 200 x 200 x 70 mm **Ligna** paving can be laid in a traditional pattern and are suitable for most applications.

The Night Blue colour has the appearance of natural stone with all the laying advantages of concrete paving.

Ligna-design®

10

11

The smallest units available are the 200 x 50 x 70 mm **Ligna**.

The picture shows Night Blue at the front with Chocolate Brown behind.

This pavior size is available in both colours and also in a choice of smooth and textured surface finishes.

Ligna-design®

12

13

The 200 x 50 x 70 mm **Ligna** Chocolate Brown

makes an alternative to a traditional garden path.

It demarcates the edge of the borders with a colour that

is sympathetic to its natural surroundings.
