Novostones®

The Overall Solution

Queen Street - Cardiff

Paving from the Blyko Novostones® range creates a definitive architectural statement for all prestigious paving projects. Novostones® offer the appearance of natural stone with the technical qualities of a precast concrete.

Manufactured in an array of sizes and colours the Novostones® paving forms a unique appearance enhancing the external features of both contemporary and traditional building landscapes. In a combination of Novostones® colours, individually designed street furniture and Percola® permeable paving are available to create a total design solution.

As illustrated, Novostones® paving is available in an extensive range of vibrant colours. The top surface is a "facemix" of specially selected naturally coloured aggregates. The final manufacturing process reveals the natural aggregate creating a choice of shotblast or polished finishes.

Guaranteed to the highest European quality requirements the complete Novostones® paving range is CE certified. The assured technical quality provides a paving designer with the technical assurance required to complete an aesthetic and durable solution. The polished products are specifically produced and have been rigorously tested to ensure that the skid and slip resistance complies with the conditions set in the BS EN for paving.

Gun Wharf Quays - Portsmouth

Novostones® Street and External Design

External design opportunities are enhanced by incorporating the Novostones® colours and finishes through a range of unique external features. The extensive collection of street design products can be incorporated into a Novostones® paving project or used independently within an existing scheme.

The street furniture includes seats, benches, bollards and tree grilles that are available as bespoke designs or selected from a pre-designed range. Steps and kerbs are manufactured to meet the specific requirements of a project.
